The Pechenegs Aleksander Paro? 2021 "In The Pechenegs: Nomads in the Political and Cultural Landscape of Medieval Europe Aleksander Paro? offers a reflection on the history of the Pechenegs, a nomadic people which came to control the Black Sea steppe by the end of the ninth century. Nomadic peoples have often been presented in European historiography as aggressors and destroyers whose appearance led to only chaotic decline and economic stagnation. Making use of historical and archaeological sources along with abundant comparative material, Aleksander Paro? offers here a multifaceted and cogent image of the nomads' relations with neighboring political and cultural communities in the tenth and eleventh centuries"--

Capitalism without Capital Jonathan Haskel 2018-10-16 Early in the twenty-first century, a quiet revolution occurred. For the first time, the major developed economies began to invest more in intangible assets, like design, branding, and software, than in tangible assets, like machinery, buildings, and computers. For all sorts of businesses, the ability to deploy assets that one can neither see nor touch is increasingly the main source of long-term success. But this is not just a familiar story of the so-called new economy. Capitalism without Capital shows that the growing importance of intangible assets has also played a role in some of the larger economic changes of the past decade, including the growth in economic inequality and the stagnation of productivity. Jonathan Haskel and Stian Westlake explore the unusual economic characteristics of intangible investment and discuss how an economy rich in intangibles is fundamentally different from one based on tangibles. Capitalism without Capital concludes by outlining how managers, investors, and policymakers can exploit the characteristics of an intangible age to grow their businesses, portfolios, and economies.

Ruins on Stone Hill F. P. Spirit 2016-12-06 Mix magic and mystery with four novice heroes and trouble is sure to follow. A dark malevolence threatens Ravenford--the town under siege by forces unknown. Their only hope may lie in four newcomers: Lloyd, a young warrior with blades of fire, Glolindir, an elven wizard as deadly to his friends as his enemies, Seth, a cynical halfling who may be an assassin, and Aksel, a quiet gnome whose very touch can heal. From eerie woods to haunted ruins, secret passages to hidden rooms, they must unearth the root of the darkness that has Ravenford at its mercy. With death breathing down their necks, will they rise to the challenge and become the heroes that

Ravenford so sorely needs?

Shadow on the Mountain Margi Preus 2012-10-01 Shadow on the Mountain recounts the adventures of a 14-year-old Norwegian boy named Espen during World War II. After Nazi Germany invades and occupies Norway, Espen and his friends are swept up in the Norwegian resistance movement. Espen gets his start by delivering illegal newspapers, then graduates to the role of courier and finally becomes a spy, dodging the Gestapo along the way. During five years under the Nazi regime, he gains—and loses—friends, falls in love, and makes one small mistake that threatens to catch up with him as he sets out to escape on skis over the mountains to Sweden. Preus incorporates archival photographs, maps, and other images to tell this story based on the real-life adventures of Norwegian Erling Storrusten, whom Preus interviewed in Norway.

Recent Progress in Hormone Research Roy O. Greep 2013-10-22 Recent Progress in Hormone Research, Volume 39 presents the proceedings of the 1982 Laurentian Hormone Conference. The book presents papers on the ovarian triad of the primate menstrual cycle; the measurement of local glucose utilization and its use in localization of functional activity in the central nervous system of animals and human; and the impact of estrogens on hypothalamic nerve cells. The text also describes the biosynthesis, processing, and secretion of parathormone and secretory protein-1; gastrointestinal peptides; chemical and biological characterization of corticotropin releasing factor; and the regulation of kidney functions by hormones. Papers on calcitonin, prolactin, and growth hormone gene expression; the expression of cloned growth hormone and metallothionein genes in heterologous cells; and the actions of insulin on glucose transport and cAMP phosphodiesterase in fat cells are also encompassed. The book further tackles papers on hormone-induced morphogenesis and growth; and Leydig cell structure and steroidogenic function. Endocrinologists, physiologists, biochemists, and scientists involved in hormone research will prove the text invaluable.
