Hotshot Julie Garwood 2013-08-06 When a woman's dream for the future turns into a nightmare, a handsome FBI agent makes her vulnerable to more than she ever imagined in this novel from #1 New York Times bestselling author Julie Garwood. Peyton Lockhart and her sisters have just inherited Bishop's Cove, a charming oceanfront resort. But it comes with a condition: They must run the resort for one year and show a profit—only then will they own it. Peyton welcomes the challenge, yet has no idea how many people want to sabotage her success—including her vindictive cousins and the powerful land developers who have an eye on the coveted beachfront property. But when the threats against Peyton escalate into dangerous territory, she enlists the help of her childhood friend, FBI agent Finn MacBain. Finn saved her life once before. Peyton has no choice but to trust him to do it again.

Renaissance Portraits Lorne Campbell 1990 What kinds of portraits were produced during the Renaissance? Who produced them and for whom? How were they painted? Why were they wanted and how were they used? In this book, Lorne Campbell addresses these fundamental questions by exploring the aesthetic, technical, social, and economic aspects of Renaissance portrait-painting and by offering a close examination of the works of such artists as Jan van Eyck, Leonardo, Dürer, Raphael, Holbein, and Titian.

Thinking Like an Island Jennifer Chirico 2015-04-30 Hawaii is a rare and special place, in which beauty and isolation combine to form a vision of paradise. That isolation, though, comes at a price: resources in modern-day Hawaii are strained and expensive, and current economic models dictate that the Hawaiian Islands are reliant upon imported food, fuels, and other materials. Yet the islands supported a historic Hawaiian population of a million people or more. This was possible because Hawaiians, prior to European contact, had learned the ecological limits of their islands and how to live sustainably within them. Today, Hawaii is experiencing a surge of new strategies that make living in the islands more ecologically, economically, and socially resilient. A vibrant native agriculture movement helps feed Hawaiians with traditional foods, and employs local farmers using traditional methods; efforts at green homebuilding help provide healthy, comfortable housing that exists in better harmony with the environment; efforts to recycle wastewater help reduce stress on fragile freshwater resources; school gardens help feed families and reconnect them with local food and farming. At the same time, many of the people who have developed these strategies find that their processes reflect, and in some cases draw from, the lessons learned by Hawaiians over thousands of years. This collection of case studies is a road map to help other isolated communities, island and mainland, navigate their own paths to sustainability, and establishes Hawaii as a model from which other communities can draw inspiration, practical advice, and hope for the future.
