Gabon International Monetary Fund. African Dept. 2015-02-25 This 2014 Article IV Consultation highlights that Gabon's growth performance has recently been strong, but fiscal pressures have increased significantly. Real GDP growth has averaged about 6 percent in the last four years on the back of substantial scaling-up of capital spending as the authorities implement their strategy Plan Stratégique Gabon Emergent to promote economic diversification and growth inclusiveness. The medium-term growth outlook has weakened as a result of the sharp decline in oil prices, but is expected to remain relatively strong. Growth is expected to be driven by a number of projects under way in agro-industry, mining, and wood processing.

The highly anticipated new edition retains each of the key features (e.g. TOC, writing style, pedagogy, robust EOC) on which users of Weygandt Financial have come to rely, while putting the focus on international companies/examples, discussing financial accounting principles and procedures within the context of IFRS, and providing EOC exercises and problems that present students with foreign currency examples instead of solely U.S. dollars.
